C.E.T. Company Limited

CET Ltd is a wholly foreign-owned enterprise. It was founded in 1996 in Guangdong with a total investment of 10 million US dollars. specializing in the production of energy saving and environmentally friendly LED lighting and other products. The company is currently located in Jiashan City, Zhejiang Province, with a factory area of 35,000 square meters. The total number of technical personnel and employees is more than 800.

CET has a rigorous quality management system , advanced production equipment that meets international standard , professional testing instruments and provides testing solutions. Each lighting has passed multiple detection schemes such as endurance life, light decay, waterproof and antifreeze to ensure energy saving and safety of each lighting. CET has a variety of quality inspection certificates and holds many patent certificates , to ensure the quality and innovation of their products

C.E.T insists on positioning: an independent research and development lighting company with international aspect. They develop new products every year which have different models and functions. CET company is offering customized services to customers to meet the different requirements of their needs. They can develop and produce a product based on customer concepts or even pictures. And carry out a series of quality inspections to ensure the quality of the products.

C.E.T has experienced considerable development since its inception 25 years ago. The company's production process has been through the transformation and upgrading of automated production. The company has a large number of automated machinery and equipment, such as automatic sealing machine, automatic welding machine, electric forklift, automated loading and unloading platform. These devices and machines have greatly increased the speed of production.

In the future, CET will continue aim to be “innovate and customize, save energy and safety, quality assurance, and market leading company”. For the purpose of meeting customer needs, treating fairly with employees and partners and focus on custom product requirements. Creating a world-class lighting company by serve the world, keep develop energy-saving and environmentally friendly lighting
